

Software Developer Job Offer

Background

Nebula Systems, a newly acquired RAC Group Company, was founded in 2013 by the Directors of DEC Automotive, a world leader in automotive diagnostic systems development, and Maverick Technology, one of the UK's leading aftermarket diagnostic tool distributors. Their 20 years of shared history is the bedrock for the future success of Nebula Systems with its new partner, the RAC.

We're passionate about developing innovative cloud-based solutions for the Connected-Car industry and our award winning MECH5 platform is set to disrupt B2B and B2C markets across the world. The scope of applications for MECH5, across a wealth of sectors, is simply immense and the opportunities for growth are virtually limitless. With MECH5 set to transform the connected-car market, it represents an incredibly exciting time for us and our partners.

At Nebula we take pride in the **QUALITY** of what we do and hold **RESPECT, INTEGRITY** and **INNOVATION** as our pillars. If you feel identified with these values, then you will find Nebula Systems a great place to work and grow, both personally and professionally.

Our journey is just beginning and we're inviting you to form part of a cutting edge Company, helping define the Connected Car landscape.

Are you ready to come along for the ride?

Job Description

We're looking for true Developers. Not just any developer...we want those who love creating through code, who are not afraid of designing, coding and even testing what you or others do. Those who live and breathe code and take pride in their work.

As a Developer, you will be required to be on the lookout for constant improvement, show great attitude and willingness to share and discuss ideas. Your role will be to design, develop and maintain the MECH5 platform and internal tools related to the MECH5 platform.

At Nebula, you will be working with a team of skilled, highly motivated individuals towards hitting milestones and deadlines.

Qualifications

- Strong knowledge of the .NET Stack (C# and VB.Net)
- Very good web development skills (HTML - JavaScript - AJAX/JQuery – ASP.NET)
- Web Services Knowledge
- Good desktop development skills (Winforms and WPF)
- Good SQL database knowledge (MS SQL preferred)

- Azure Platform Knowledge (preferred)
- Web responsive design skills (preferred)
- Ability to analyze and find solutions to requirements or problems
- Experience working in Agile Teams (preferred)
- Mobile App Development with Xamarin (preferred)
